

Expansion Poises Mathias Die Company for Continued Industry Leadership

St. Paul, MN – August 22, 2016

Mathias Die Company, Inc. made significant business model enhancements in 2015 with the completion of a facilities expansion and the acquisition of Qualitek Engineering and Manufacturing, Inc.

The facilities expansion has allowed Mathias Die Company to double its manufacturing footprint and create a customer training facility for its new Tooling and Converting Workshops. The workshops are designed to train the importance of the tooling solution in converting. Various hands on press demonstrations and tooling specific applications are also presented and trained within the facility.

The acquisition of Qualitek Engineering and Manufacturing, Inc. has given Mathias Die Company new and enhanced tooling solutions. Solution enhancements include: Precision tolerance permanent tooling for the stamping of metals and plastics, complex component fabrication, machining, permanent tool sharpening, wire and sinker EDM, jig grinding, assembly & lamination fixtures, cutting & stamping, design, and product development support.

“Our facility expansion and Qualitek acquisition will support our continued leadership as a design, engineering, and tooling solutions provider for our customers,” said Mathias Die Company’s President Tom Mathias. “Our new product and service offerings strengthen our engineering and consulting expertise to further support our customers from product conception to product realization.”

About Mathias Die Company

Mathias Die Company has been an industry leading producer of tooling and converting solutions for nearly 50 years. MDC manufactures a comprehensive line of cutting and stamping dies. We provide engineer supported converting solutions including; early stage product development, process validation, converting support, and converting method integration. We remain committed to improving production converting operations, results, and efficiencies that meet your company’s growth objectives.
