For Immediate Release: August 16, 2016

MacDermid Autotype is pleased to announce that Regal Graphics is now serving North America as an Authorized Reseller of Autoflex, Autotex, and Autostat brand of high performance industrial film products.

MacDermid Autotype is a leading global developer and manufacturer of high performance hardcoated and stabilized films whose products are widely used for membrane touch switch, graphic overlay, functional control, and printed electronics for industrial, consumer and medical device applications. Using our expertise in proprietary precision coating technology, MacDermid Autotype transforms and enhances the functional characteristics of films for many highly technical and demanding applications.

Regal Graphics, the nation's foremost specialty plastic films converter and distributor, offers strategically located converting and distribution centers throughout the US. These world-class facilities allow for immediate availability of competitively priced product, converted to meet exact size requirements with no minimum order quantities. This allows customers the ability to lower their costs by combining their MacDermid Autotex, Autoflex, and Autostat high performance industrial films into one purchase and shipment with their current LEXAN™ polycarbonate requirements.

MacDermid Autotype and Regal Graphics' customers will benefit by minimizing product lead times and gaining the ability to more efficiently manage their inventory.
